- 7 x 10 mm hose size
- 9 x 12 mm hose size
- 3/8" x 1/2" hose size
- Reduce or eliminate hose failures causing safety and lost paint & production issues

Hosco Fittings LLC Announces New Line of Plastic Nylon Hose Fittings

This new line of plastic nylon hose fittings is made to help reduce or eliminate hose failures in factories around the world. Our new line of Plastic Nylon Hose Fittings are certified "silicone free" along with the rest of Hosco Fittings finishing products.

This specific line of hose fitting will help reduce hose failures that can cause safety issues, paint loss, or production issues. The fittings are made with injection molded Nylon. The non-conductive fittings are made with double barb design for maximum hose retention, and are ideal for electrostatic coating or other applications which require a lightweight, durable hose connector. Sizes are available now in 6 x 8, 7 x 10, 9 x 12, and 3/8" x 1/2" hose size, all with 1/4" NPT male thread.
